Analysis of a counter-current tallow-splitting column by M. A. El Rifai, S. S. E. H. El Nashaie and A. A. Kafafi 59
Analytical study of the dynamics of binary distillation columns by J. B. Edwards and H. J. Jassim 17
Aspects of process design of gas/liquid reactors by V. A. Juvekar and M. M. Sharma 77

Behaviour of dynamic cellular foams by L. Steiner, R. Hunkeler and S. Hartland 153
Bubble growth due to coalescence in fluidised beds by R. C. Darton, R. D. LaNauze, J. F. Davidson and D. Harrison 274

Coalescence of liquid/liquid dispersions in gravity settlers by J. Golob and R. Modic 207
Comparison of contacting efficiencies and mass transfer coefficients for various contacting conditions by J. A. Golding and C. C. Mah 216
Contamination of plasma arcs by electrode vapour by P. W. Norman and I. Fells 149

Design and control of homogenisation for minerals processing by J. Parnaby 104
Detection of malfunction using a process computer: a Kalman filtering technique for general control loops by B. Bellingham and F. P. Lees 253
Detection of malfunction using a process control computer: A simple filtering technique for flow control loops by B. Bellingham and F. P. Lees 1
Dispersion and flow phenomena on a sieve plate by J. Sohlo and S. Kinnunen 71
Droplet sizes on sieve plates operating in the spray regime by W. V. Pinczewski and C. J. D. Fell 46

Evaporation of spray in the jet zone from a nozzle atomiser by Q. T. Pham and R. B. Keey 114
Experimental investigation of a copper catalyst for the liquid phase hydrogenation of olefins by A. Clarke, J. Lloydlangston and W. J. Thomas 93
Extension of the quasi-linear method for non-ideal distillation calculations by C. F. Shewchuk 130

Free convection effects for heat transfer to fluids in laminar flow inside vertical tubes with constant wall temperature by R. Dodd 223
Furnace design methods by D. A. Lihou 225
Further studies on the performance of a Graesser raining bucket liquid/liquid contactor by P. S. M. Wang, J. Ingham and C. Hanson 192

Influence of the vessel to screw diameter ratio on efficiency of screw agitators by V. Novak and F. Rieger 202
Interpretation of the coalescence behaviour of dispersed droplets in a stirred flow tank in terms of quasi-chemical kinetics by K. Nakada and M. Tanaka 143

Page

Mathematical modelling of olefin oxidation over oxide catalysts: Part III isobutene to methacrolein and carbon oxides over bismuth molybdate by J. Cartlidge, L. McGrath and S. H. Wilson 164
Matrix methods for the solution of fluid network problems: Part II Diakoptric methods by B. Gay and P. E. Preece .. 38
Measurement of incipient fluidisation velocities in a bed of coarse dolomite at temperature and pressure by S. C. Saxena and G. J. Vogel 184
Measurement of large interfacial areas by light attenuation by J. Landau, H. G. Gomaa and A. M. Al Taweel 212
Model for chemical reaction in the freeboard region above a fluidised bed by J. G. Yates and P. N. Rowe 137
Murphree point efficiencies in multicomponent systems by R. Krishna, H. F. Martinez, R. Sreedhar and G. L. Standart 178

New distributor for gas fluidised beds by G. R. Rigby, T. G. Callcott, B. Singh and B. R. Evans 68

Plate efficiency in the spray regime by K. E. Porter, A. Safekourdi and M. J. Lockett 190

Relationship between the froth and spray regimes and the orifice processes occurring on perforated distillation plates by G. J. Payne and R. G. H. Prince 266
Residence time model for rotary drums by J. J. Kelly and P. O'Donnell 243
Role of inhibitors in the kinetics of sulphite oxidation by E. R. Altwicker 281

Secondary flows of non-Newtonian fluids: Part III turbulent flow of visco-inelastic fluids in coiled tubes: A theoretical analysis and experimental verification by R. A. Mashelkar and G. V. Devarajan 29
Simple correlation for fluidisation and sedimentation by G. B. Wallis 74
Slug velocity and slug frequency measurements in concurrent air/non-Newtonian slug flow by L. Otten and A. S. Fayed 64
Suspension of floating solids in stirred vessels by G. E. H. Joosten, J. G. M., Schilder and A. M. Broere 220

Terminal velocity of a chain of drops or bubbles in a liquid by N. M. Omran and P. J. Foster 171
Transient and stead-state analysis of cross-flow heat exchangers by programs in FORTRAN by J. R. Simonson 53

Wake phenomena behind spherical-cap bubbles and solid spherical-cap bodies by J. H. C. Coppus, K. Rietema and S. P. P. Ottengraf 122

PREVIEW

The following papers have been accepted for publication in the January 1978 *issue of The Transactions.*

The behaviour of aggregates in stirred vessels.
Part I—Theoretical considerations on the effects of agitation.
Part II—An experimental study of the flocculation of galena in a stirred tank.
By D. T. Tomi and D. F. Bagster.

Flow visualisation and residence time studies in a spray drier.
By A. O. Ade-John and G. V. Jeffreys.

Phase inversion of stirred liquid/liquid dispersions under mass transfer conditions.
By S. I. Clarke and H. Sawistowski.

Dynamic response of a continuous thickener to overloading and underloading.
By M. V. Maljian and J. A. Howell.

Process engineering calculations with equations of state.
By I. Coward, S. E. Gale and D. R. Webb.

Flow in an annulus of non-uniform gap.
By N. C. G. Markatos, R. Sala and D. B. Spalding.
